EVOLUTION to GLOBAL

The 3rd Edition of our Blockchain Summit has surprised us in times of pandemic ... which for good, has made us redouble our creativity, our passion and our enthusiasm.
And in addition to many new features, advances and creativity, there has been a fantastic evolution. Our event has become mainly VIRTUAL.
Also adding a face-to-face modality that will be fantastic and out of the ordinary and will include an updated health protocol.

We will enjoy an agile and creative streaming. We have selected powerful software and a very trained team to transmit from a TV Studio. The global broadcast will be live from different places in the world.

And we are also showing a rebranding.
Now Blockchain Summit UY is ... BLOCKCHAIN SUMMIT GLOBAL.
With great ambition and vocation, the 3rd Edition will be global.

Blockchain will be the big topic and it will work as a trigger, adding the technologies that together are generating current use cases, innovation and development, all aimed to Revolution 4.0.
As an example, we will have presentations on AI, IoT, 5G, XR, and Quanting Computing.

During the event we will talk about DEFI, FINTECH, CYBERSECURITY, STABLECOINS and also about the LEGAL support of Blockchain initiatives, we will have the main Platforms, the launch of new versions, active Mining projects, and a lot of action in relation to the main cryptocurrencies, their price and opportunities from the perspective of the most outstanding traders.

September 3, 2020 Event Highlights

*** Over 40 visionary Speakers with a great Agenda… amazing!**

*** The best discussion panels including our well known "Women in Blockchain" and again the successful "Journalists in Tech"**

*** Real world "Use Cases" …of companies that have already started their journey to Blockchain technology.**

*** Presentations of renowned Platforms that are in action.**

*** A very challenging CRYPTO Agenda.**

*** Our classic presentation with Central Banks authorities.**

*** Workshops by large global companies.**

*** ...and fantastic options for Networking.**
